

[Install Icecast Centova Cast Cracked](#)

changes to take effect.

10.2. Searching your Media

Centova Cast includes a powerful search feature allowing you to quickly and easily locate specific artists, albums, and tracks in media libraries of all sizes. The search feature is located at the top of the page, above the artist list, and is composed of the following fields:

Keyword field

Enter the word or phrase for which you want to search in the keyword field.

Criteria field

The criteria field is located to the immediate right of the keyword field, and contains the following options:

- *Artists*: Specifies that the search should match only the names of artists in your library.
- *Albums*: Specifies that the search should match only the names of albums in your library.
- *Tracks*: Specifies that the search should match only the titles of tracks in your library.
- *All*: Specifies that the search should match artist names, album names, or track titles.

Genre field

The genre field is located to the immediate right of the criteria field, and contains a list of the music genres included in your media library. By default, "All genres" is selected, which specifies that you do not want to filter your results by any particular genre. Selecting a genre will limit the search results to tracks of that genre.

Note that Centova Cast has no control over the genres associated with each track in your library. The genre for each track is specified by the person who created the MP3 file at the time at which the MP3 was created, and Centova Cast simply uses that information verbatim to classify the track by genre.

10.3. Album Covers

Centova Cast is able to import album cover images when importing media for the autoDJ, to be shown both in the media library and on the stream start pages. Centova Cast looks for cover images in the following places (in order of preference) when working with the media you have uploaded:

1. In a JPEG file with the same name as the MP3 file.

Example:

Uploaded MP3 filename: My Music\demo_track.mp3

Cover filename: My Music\demo_track.jpg
